EXPERIENCE

FreeLancer, Sydney — Full Stack developer

Mar 2023 - PRESENT

I develop dynamic, responsive and user friendly web applications.

HTML, CSS, Figma, JavaScript, Reactjs, Redux, Nodejs, Expressjs,

MongoDb and trello are major tools which I use to carve dreams into reality.

SKILLS

Software Engineering

Strict Agile Follower

HTML, CSS, ES6, JavaScript

Reactjs, Expressjs, MongoDB

EDUCATION

Victoria University, Sydney — Masters

Aug 2022 - Dec 2023

I am pursuing a Master of Applied Information Technology in Victoria University. Software Engineering is my major subject.

LANGUAGES

English - Advanced Level

Nepali - Advanced level

Victoria University, Sydney — Bachelors

Jul 2019 - Jul 2022

I completed a Bachelor of Information Technology in Victoria University. Web and Mobile Application Development was my major area. While I chose System and Business analytics as an elective subject.

PROJECTS

Automated Plant Watering System

Developed a prototype of an automated plant watering system using Arduino Uno in my bachelor's final project. I chose C++ as a programming language and Arduino Opla Kit as a microcontroller. This system measures the humidity level of the soil and regularly returns data to the user on a mobile app. Its sensor will automatically measure the moisture and if moisture level is low then the system will irrigate the plant automatically.
